

# Teaching a Space Alien

I would like you to create a Canva Presentation teaching me how to do something. As part of this, you must pretend the person you are teaching is a space alien that crashed on Earth last week. Strangely enough, this alien can speak English, even though they have never been here before.

I don't care what you teach them, but, you need to keep in mind that whatever you teach them, you have to assume they don't know anything! For example, if you are teaching them how to play football, you even have to explain what a football is and even describe what the game is about!

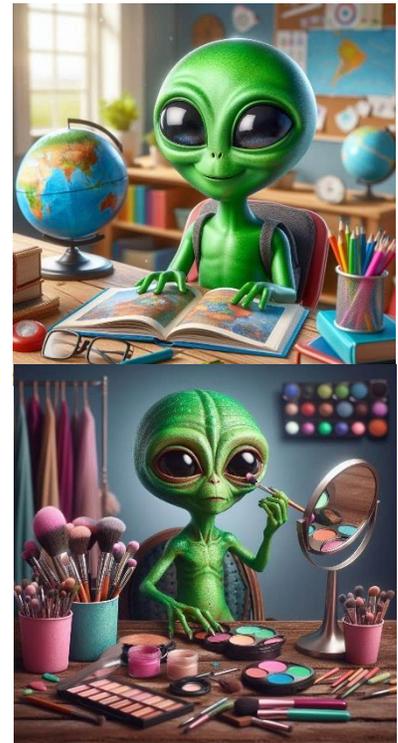

Make you give lots of DETAILS!

Topic ideas:

- How to cook a food or dessert
- How to play a sport
- How to do laundry
- How to play an instrument
- How to train a puppy
- How to babysit
- How to play chess
- How to solve a Rubrics Cube
- How to mow the lawn
- How to put on makeup
- How to crochet or knit
- How to do first aid
- Any other topic that you want to do

It should contain nice fonts, eye catching graphics, animations, and anything else that would make your presentation stand out compared to everyone else that is making one. You may have some sound effects, but do not over do them!

You will be graded on the quality of your project as well as how unique it is compared to everyone else's projects. Be unique!

**Put this in your portfolio!**
