### M&M Survey

I like M&M’s because they melt in your mouth and not in your hands. They come in many colors and are pretty. They come in plain, peanut, almond, and pretzel.

For our project, we had to count the amount of M&M’s in different packages. It is interesting to see how many we were able to count.

Please write at least three sentences about M&M’s right here and then put the reference information in the correct place.

I got this information off the Internet and with the help of my teacher.
